

# Bhargav Petla

AI Consultant | SDA Bocconi, MBA

Mumbai, India

AI and tech consulting leader with 2+ years of experience delivering enterprise AI strategy, agentic operating model transformation, product innovation, and helping C-level and business heads translate advanced technology into practical outcomes and high-ROI AI adoption across industries.

## WORK EXPERIENCE

### Network Science

### AI Engagement Analyst

Apr 24 – Present

- Led AI consulting engagements across India, Europe, and on-site in Dubai, guiding senior leadership on **AI strategy** while identifying **120+ high impact use cases** and **50+ integration workflows** for enterprise-scale adoption.
- Architected scalable agentic AI systems delivering **35+ production ready agents** and MCP driven integrations, enabling **60%+ reduction in manual processes** through **A2A workflows** for enterprise knowledge automation.
- Designed AI transformation roadmaps for **5+ enterprises** across multi-quarter horizons, built **50+ KPIs using metric-backward approach**, and defined **AI OS** aligned use case portfolios to systematically quantify business value.

### AI-Fication Specialist & COE lead

Aug 25 – Present

- Led the original vision, business model, and architecture for NSOffice.ai, an enterprise AI productivity platform that lets employees **chat with multiple AI models in one workspace, search across all internal systems and documents from a single bar**, and trigger domain-specific AI agents to execute workflows end-to-end.
- Led the **AI Center of Excellence for NSOffice.ai**, driving cross-functional alignment and establishing governance & quality benchmarks while mentoring engineers and consultants in building secure, scalable, high-impact AI capabilities for enterprise clients.
- Evaluated **150+ AI technologies** and benchmarked frameworks such as **Mem0, CrewAI, and LangGraph**, synthesizing insights into enterprise AI architecture recommendations across **GenAI models, agentic systems, LLM orchestration, and vector database stacks**.

### Dell Technologies

### FDP Intern - Finance

Apr 23 – Jun 23

- Worked on **channel GTM strategy** through financial analysis (Ratio, Price and Productivity analysis) using **Excel and Power BI** and assessed the productivity of the GBO sales channel by implementing an alert system.
- Identified and developed **20+ KPIs** to measure productivity using dashboards which identified Best practices across regions(NA), promoting shared learning and resources to improve data-driven insights.

## ACHIEVEMENTS & SKILLS

### Achievements

- Recognized as a top performer with **5x Employee of the Month**, and the **Employee of the Year award(2025)**, reflecting exceptional delivery and leadershipAwarded the Trailblazer and Wolf Pack (Team Performance) awards for pioneering **new AI initiatives**, driving client trust through innovation, and consistently elevating team performance across **high-impact enterprise engagements**.

### Skills

- **Languages:** English, Telugu, Hindi, Japanese (Elementary Proficiency)
- **Thesis:** Building Information Classification Using Google Street View Images: Developed AI-based CNN model for building instance classification, enhancing land usage planning (2022)
- **Skills:** Business Analysis, Solution design, RFP Response, AI Transformation, Digital Transformation.
